

Notes

1) This set is designed to use type 201A tubes with 5-volt 1/4-amp filaments and a type 200 detector with a 5-volt 1-amp filament.

2) A type 200A tube could be used for the detector. It was released after this set went out of production, so it was never sold as original equipment.

VERIFIED SCHEMATIC
The information presented is correct based on comparison with several original sets.
